

CHEMISTRY ANALYST

Alnwick, United Kingdom
Chantilly, Virginia
Greenfield, Indiana
Harrogate, United Kingdom
Indianapolis, Indiana
Madison, Wisconsin
Porcheville, France
Shanghai, China

Put the skills you gained during college into practice in our Analytical Service labs. Choose from opportunities in areas spanning Bioanalytical Chemistry, Drug Metabolism, Immunochemistry and Biotechnology Services.

As a Covance Chemistry Lab Analyst, you'll become an expert in analyzing samples for various compounds and components while complying with applicable methods, protocols, SOPs and regulatory agency guidelines. More specifically you'll:

- Update and maintain laboratory records and study documents.
- Operate and maintain lab equipment.
- Take part in project meetings, helping to plan, monitor and guide project work.
- Control data quality.
- Report any problems and/or deviations that may affect the integrity of the data to the Study Director, Principal Investigator and/or management.
- Help build a cohesive team.

Chemistry Systems & Technology

The Analytical Instrumentation you'll make the most of includes, Spectroscopic, Mass Spectrometry and Chromatography Systems, such as:

- IR spectrometer
- Atomic absorption spectrometer
- UV spectrometer
- Biochemical analyser
- HP GC/MSD
- ICP
- LC/MS
- LC/MS/MS
- GC/MS
- GC/TEA
- GC/MS/MS
- HPLC
- GS
- Capillary electrophoresis
- TLC
- Photostability
