

NUTRITIONAL CHEMISTRY & FOOD SAFETY

Battle Creek, Michigan
Greenfield, Indiana
Harrogate, United Kingdom
Madison, Wisconsin
Singapore

Make the most of the skills you gained studying for your Food Science, Nutrition Science, Chemistry, Biochemistry or related Life Science degree. Put them to work in our Nutritional Chemistry & Food Safety Labs. Capitalizing on many current industry standard test methods, you'll carry out analytical testing for a wide range of foods, supplements and packaging, helping clients formulate, develop and distribute their products to consumers worldwide. The tests make sure products comply with regulatory standards and most testing verifies nutritional labeling, an area of growing importance.

Join us as a Chemistry Lab Analyst.

You'll become an expert at analyzing samples for various compounds and components while complying with applicable methods, protocols, SOPs and regulatory agency guidelines. More specifically, you'll:

- Analyze samples for mandatory nutritional labeling information.
- Verify the potency of raw materials.
- Collaborate closely with a small team and work independently.
- Complete a wide variety of wet-chem or micro procedures.
- Use analytical balances, UV-Spec, HPLC, GC, ICP, ICP-MS, UPLC, HPTLC and more.
- Handle an electronic Laboratory Information Management System (LIMS).
- Support key clients by analyzing samples during the actual manufacturing process.
