

STUDY TECHNICIAN

Alnwick, United Kingdom
Greenfield, Indiana
Harrogate, United Kingdom
Madison, Wisconsin
Munster, Germany
Porcheville, France
Shanghai, China

Work in a fun, yet challenging environment. Seize opportunities to grow and progress. Capitalize on a dedicated training and development program that will support your scientific and professional career aspirations. And take pride in delivering scientific work that helps save the lives of millions of people around the world.

As a Covance Study Technician, you can make the most of your education, experience and interests in a number of departments.

In-Life and Pathology.

You'll collect, document and manage data that includes animal observations, test material administration and clinical samples. And you'll enjoy working with animals daily.

Dose Formulation.

Working with pharmaceutical products in a lab, you'll prepare vehicles, diets, solutions and capsules with test material according to study protocols and SOPs.

Genetic Toxicology.

Here you'll assess the genetic damage caused by chemicals as well as the response to that damage. Working in a genetic lab and using basic chemistry skills, you'll carry out in vitro, in vivo and exploratory screening.

Metabolism In-Life.

The work here is similar to that in a Toxicology In-Life position, but also includes tracking the test material as it moves through the body. You too will enjoy working with animals every day.

Discovery Services.

You'll carry out technical phases of complex lead optimization toxicology, ADME, in vivo pharmacology, and molecular and anatomical imaging studies. You'll work with animals every day while benefiting from a technically diverse, non-GLP environment.
